

## Decoration Idea: The Lemon Pig

### **Here's how to make it:**

The pointed end of the lemon will become the pig's nose. For its legs, use either four toothpicks (look at the picture to the right) that you broke in half or carefully carve out three sides of four sections along the side of the pig (look at the picture to the left) and then fold these out to make the legs.

Do the same to make its ears - but it's even easier if you cut two slits and then stick either bay leaves or almonds in the cuts to form the ears. Use two cloves or pepper corns to make its eyes and your pig is already starting to look funny.

Don't forget the curly little tail - and your lemon pig is finished!
